Battery compartment

### **Specifications:**

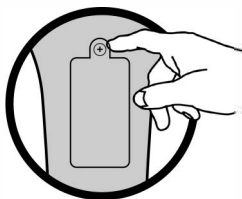

Weight Range: 0-30 Pounds

Measurement: Display in Pounds, Pounds & Ounces or Kilo.

Battery: Two AAA

### **Battery Installation:**

Open package of AAA batteries included with your scale. Use a Phillips head screwdriver to loosen the Battery Door Screw. Screw will be loosened after 15 rotations. Once screw is loosened, remove Battery Door with index finger as shown. Insert two AAA Batteries. Snap Battery Door back in place and tighten Battery Door Screw.

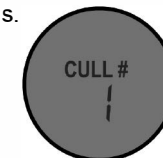

**Button Configuration:** Left Button, On/Off Button, and Right Button

### **Operating Instructions:**

- A. Powering on the scale:** Press On/Off Button to turn on scale.
- B. Powering off the scale:** Press and Hold On/Off Button for 3 seconds.
- C. Set desired measure:** Press and Hold Left & Right Button to display in Lbs., Lbs. & Oz, or Kilos.
- D. Set desired operating mode:** Press & Hold Right Button to operate in Simple, Aggregate or Culling Mode.
- E. Tare Feature:** Weigh basket or container until weight is locked in and display shows "Hold". Press On/Off Button to zero out scale.

### **F. Cull Mode Operations:**

- 1) Set Cull Limit: Press & Hold On/Off and Right Button for 2 seconds. Cull Limit will flash. Press Right Button to change Cull Limit. Press On/Off to save Cull Limit changes. (Unit is set to a 5 Cull Limit by default)
- 2) Locking in fish weights: Weigh fish until the word "Hold" is displayed. The weight is now locked. Press Left Button and the next open weight slot will flash. New fish weight will automatically populate the open weight slot.
- 3) Editing or Deleting Weights: Press & Hold Left Button for 3 seconds. Weight #1 will flash. Press Left Button once to toggle to next weight. Once you reach the flashing weight you want to edit Press & Hold Left Button for 3 seconds. This will ZERO out the weight. The next saved fish weight will enter the edited slot. To zero all 5 weights, toggle until all weights flash. Press & Hold Left Button for 3 seconds.
- 4) Once the Cull Limit is reached the next catch will cause scale to display either "No Cull" or a Cull # in lower left-hand corner of display. The fish number displayed is the fish number to cull.

### **G. Aggregate Mode Operation:**

Keep a running tally of total fish weight and number of fish caught.

- 1) Locking in fish weights: Weigh fish until the word "Hold" is displayed. The weight is now locked. Press Left Button to add the next fish weight to your Total Weight. Scale will zero out after weight saved and is ready for your next fish weight.
- 2) Edit or Reset Total Weight: Press & Hold Left Button for 3 seconds. Total Weight will flash. Press and Hold Left Button to zero out weight and Cull # tally.

### **H. Calibration Mode:**

- 1) Turn on the scale. When display shows 8888, press On/Off button 3 times to enter calibration mode. Screen displays CAL1.
- 2) Click Left Button and hold the scale vertically. Screen shows 5 LB. Place 5 lb weight on the scale. Make sure the scale is held vertically.
- 3) After mounting the weight on scale, the calibration is automatic and display will show PASS. Press On/Off to return to weighing modes.

### **I. General Description of Modes:**

- 1) CULL Mode: Allows user to pre-set the CULL number for the event and display the weight of each fish in live well (Up to 10 fish Cull Limit with 5 fish weights always displayed). Keeps a real-time tally of your fish weights, including the lightest current fish and reminds user by showing the CULL # of the lightest fish.
- 2) Aggregate Mode: Keeps a running total of fish weight and the number of fish caught. Perfect for many events that promote live-release of fish.
- 3) Simple Mode: Recreational mode which allows user to quickly weigh fish.

### **J. General Handling Instructions:**

- 1) Intended Use: Please use scale for weighing fish and tracking fish weights as intended. Improper use of the scale may result in damage to the scale or injuries. Manufacturer is not responsible for any damages caused by misuse of the product.
- 2) Cleaning: Clean with damp towel.
- 3) Maximum Weight: Do not attempt to weigh objects greater than 30 pounds.
- 4) Factory Reset: Press & Hold the Left and Right Button for 15 seconds to clear all memory from scale.
